(54) DISPLAY DEVICE OF SLOT MACHINE

(57)Abstract:

PURPOSE: To offer the display device of a slot machine which can display intelligibly a picture pattern corresponding to combination of prize-winning to a player.

CONSTITUTION: This device consists of a display window 10 formed by a liquid crystal shutter, and a control part for controlling whether its liquid crystal shutter becomes transparent or opaque, the display window 10 is positioned in front of a rotary reel, and in its display window 10, picture patterns of three pieces each of each rotary reel, that is, nine pieces of picture patterns are formed so as to be visible, and the control part is formed so that the control can be executed at every picture pattern of the rotary reels with regard to whether the display window 10 being the liquid crystal shutter becomes transparent or opaque, and also, executes the control so that only the part corresponding to the picture patterns of the combination of prize-winning becomes transparent. That is, nine parts of the display window 10 are controlled separately.
